8 Gallon Solution & Recovery

Power Cord:
25 Ft, 3 Wire Grounded, Plus
25 Ft Extension Cord

Optional Accessories:
15 Ft Solution Hose (408263)
Wand & Nozzle Assembly
w/2 Spray Jets (408271)
Upholstery Tool (379468)

MX-1408 extractor is compact and easy to operate. There are no external solution lines, hoses or separate wand to deal with, they are self-contained. It is excellent for cleaning carpeted areas in hotels, offices, stores, restaurants, and many other facilities.

Brush assisted forward/reverse action allows for the extractor to clean carpet fibers in "both" directions for more effective cleaning while reducing labor time and effort.

Control Switches

Located at operators finger tips, clearly illustrate and sealed to protect against moisture.

Trigger Lever

Squeeze the trigger to operate in reverse.

25 Ft Power Cord

Wraps around cord holder on back of handle for storage.

See-Thru Dome

Allow for constant monitoring of the extractors cleaning effectiveness.

Shared 8 Gallon Chamber Solution/Recovery System

Holds solution in a bladder and it is pumped out during the cleaning operation. As the bladder collapses dirty solution is vacuumed up and recovered in the commonly shared tank.

Adjustable, Folding Handle

Folds for convenient storage or transport and is adjustable for operators comfort when cleaning.

The tank drains fully, either into a floor drain or the supplied plastic bucket.

Two 14" Vacuum shoes

Provide continuous forward and reverse suction recovering dirty solution in either direction.

2 Sets of 2 Spray Nozzles

Operate independently, spraying ahead of the brush when cleaning in either direction. Solution volume can be adjusted using a directional valve.

Kick Stand

Lifts brush off the floor to protect it when not in use.

Accessory Quick-Connect

Connects optional accessories for cleaning upholstery, stairs, and in hard to reach areas.
