

Automatic Scrubbers

specifications

MSR-50/20B (432369)

Cleaning Path: 20"
Brush Diameter: Two 10" Rotary
Squeegee Path: 31.5 Width
Tank Capacity:
8.5 Gallon Solution
7 Gallon Recovery
Vacuum Motor: 430 Watts
Brush Motor: (2) 200 Watts Each
Brush Speed: 220 RPM
Turning Path: 43" Minimum
Battery Compartment Size:
13¹/₄" L x 13³/₄" W X 10" H
Includes:
24V Automatic Battery Charger
One Set of Brushes
**Battery Requirements:*
Two - 130 AMP Hour
(423157 - Set of Two)
**Not Included*

MSR-50/20B Battery

The compact design of this scrubber makes it easy to maneuver around tight corners and down narrow aisles.

Clean large hard surface floors fast, efficiently and thoroughly in supermarkets, shopping centers, schools, warehouses, etc.

Two counter rotating brushes with a 20" cleaning path allows solution to work towards the center, helping to prevent splash-over. Cleaning approximately 10,500 sq. ft. per. hr.

Rear mounted 31.5" squeegee with air grooved blades is free floating and has an adjustable swivel bracket.

The side rollers protect against marring of woodwork and walls.

Key activated soft touch control is located at the operator's finger tips and is clearly illustrated and illuminated.

Adjustable solution dial controls solution output for specific job applications.

Rotationally molded solution/recovery tank and battery compartment won't corrode, dent, or leak, and is resistant to chemical attack.
