

PRODUCT BULLETIN

R-584 EX-IT

- Solvent Based
- Water Emulsifiable Concentrate
- 2.30% Bromacil
- Top Kill
- Soil Sterilant
- Nonselective

DESCRIPTION

A formulation that gives a top kill and a long lasting residual effect. Even though this product is dilutable with water, it will still give a top kill because of a phytotoxic oil used as a carrier. This oil combines the properties of low volatility with rapid penetration to accelerate the absorption and translocation through the plant. The other active ingredient is Bromacil. The rapid top kill is effective on all succulent plants. This concentrate may be applied any time of the year except for when the ground is frozen. The insolubility of the herbicide in water assures full effect regardless of rainfall after application or stage of growth at the time of application. Translocation and root absorption of the active ingredient produces extensive root kill of weeds as well as long term residual control. Coverage: 1 gallon of concentrate with 9 gallons of water covers up to 2,000 square feet.

MARKETS

To be used on ramps, fence rows, railroad sidings, in storage yards, parking lots, around buildings, industrial plant sites, lumber yards, utility & pipelines, schools, highway authorities, vacant lots.

DIRECTIONS

Dilute 1 quart of product concentrate with 40 gallons of water and apply to treat 4500 square feet of soil. For tightly compacted soils, use the same dilution rate, but reduce coverage to 3500 square feet. Repeat application four times per year initially, thereafter, only twice annually is required. Re-treat localized dry spots.
