

PRODUCT BULLETIN

R-585 WK-44

- *Water Based*
- *1.22% Bromacil*
- *Nonflammable*
- *Concentrated*
- *Nonselective*
- *Soil Sterilant*

DESCRIPTION

WK-44 is nonflammable, and kills weeds for up to a full season. High water dilution rate keeps the cost per gallon low. This product kills or damages most weeds and grasses when applied at the recommended rate. When soil is thoroughly saturated with dilution, the product's active ingredient, Bromacil, quickly penetrates deeply into the soil. This fast penetration means there is no residual toxicity left above ground two to three weeks after application. This product is a liquid non-selective, general herbicide which is designed to be used where control of all vegetation is desired. It produces rapid top kill of all succulent vegetation. Translocation and root absorption produce extensive root kill of weeds and provides long term control. Sufficient moisture from rainfall or artificial means is necessary after treatment to carry the chemical into the roots of the weeds. This product can be sprayed or sprinkled on. Dilute one part product with ten parts water. Coverage: 10 Gallons of diluted product per 175 to 750 square feet.

MARKETS

This product is recommended for non-crop areas such as railroads, highways, pipelines, tank farms, lumber yards, fence rows, parking lots, industrial and food processing plants, schools, and around utility lines.

DIRECTIONS

General Instructions: This product is a liquid non-selective, general herbicide which is designed to be used where control of all vegetation is desired. It produces rapid top kill of all succulent vegetation. Translocation and root absorption produce extensive root kill of weeds and provides long term control. For easy application and better penetration dilute one gallon of this product to 10 gallons of water and apply as directed below. Sufficient moisture from rainfall or artificial means is necessary after treatment to carry the chemical into the root of the weeds. This product can be sprayed or sprinkled on. If sprayed, direct the spray to the soil at the base of the weeds and adjust for coarse spray to prevent drifting. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes or do not use same spray equipment for other purposes.
