

Automatic Scrubbers

MSR-28B Battery

specifications

MSR-28B (441783)

Cleaning Path: 28"

Brush Size: Two - 14" Rotating

Squeegee Width: 36"

Tank Capacity:

22 Gallon Solution & Recovery

Vacuum Motor: 1/2 HP

Vacuum Drive: 1/2 HP

Vacuum Brush: 1 HP

Brush Pressure: 90 Lbs

Speed: 0 to 240 Ft Per Minute

Includes:

24V Automatic Battery Charger

Four - 6V, 245 AMP Hour

Batteries (444448)

One set of Brushes

The MSR-28B is designed to clean large floor areas quickly, efficiently and thoroughly. It is excellent for use in hotels, warehouses, supermarkets, hospitals, airports, school, shopping centers, and retail stores.

Equipped with a power drive system that has multiple forward/reverse speeds and electronic shut-off prevents the recovery tank from overflowing.

Large 22 Gallon Capacity Solution and Recovery Tanks

Rotationally molded of high impact plastic, they are easy to empty. Won't dent, or leak, and resists chemical attack.

Short Wheelbase

Easy to maneuver even in small areas.

Counter Rotating Brushes

Equipped with two 14" brushes for a large 28" cleaning path.

36" Curved Double Blade Squeegee

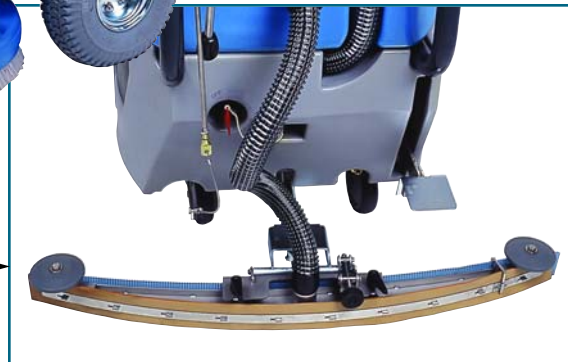

Grooved front blade allows the solution to go between the slots while the rear solid blade acts as a wiper, trapping the solution inside the squeegee for pickup. Solution is directed towards the center for more effective cleaning. It is adjustable to ensure the floor is left clean and dry, even in the grouting of tiled floors.

See-Thru Dome

Allows for constant monitoring of the scrubbers cleaning effectiveness.

Key Activated Soft Touch Control Panel

Clearly illustrated and located at operator's finger tips. The deadman switch shuts OFF the drive when the handle is released.

Battery Compartment

Easy access to component for maintenance service, and battery charging/removal.
